**Special Features:**

The aspen 2000dm desalinization unit mobile reverse osmosis system that can process 2000 gallons per day (gpd) of fresh/brackish water or 1500 gpd of sea water. It weighs approx. 410 lbs, and is fully operational on 90/250vac 50-60 hz; or from a 24 to 28 vdc power source, the same used on military vehicles. Cables for both ac and nato dc plug are provided with each system. The basic unit and support case make up the set. 15 gallon tank is internal to the set. Replacement slam drawers and pull carts are optional, not part of the initial set. The complete system operates on any of the small 2 kw or larger jp8 fueled military generators, or a small commercial generator. All internal mechanical systems are mounted on a strong lightweight aluminum frame enclosed in a ruggedized military style case
