Overall Length:

65.125 inches

Unpackaged Unit Weight:

75.0 pounds

Special Features:

Design pressure: 1000 psi at 120°F (6.89 mpa @ 49°C); fiberglass ro pressure vessel is designed for continuous, long term use as housing for reverse osmosis membrane elements to desalt typical sea waters at pressures up to 1000 psi; filament wound epoxy/glass composites-head locking grooves integrally wound in place.

Material:

Glass fiber

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
