## **General Description:**

Shelf Life:	
hastelloy c, an electrode anode of tir 2000; a temperature switch,	positive and negative terminals for connection to dc power of 50-100volts
Front and back made of machined pvc, joined by 2 stainless steel h	hinges; contains 9 bi-polar titanium plates - tir 2000, a primary cathode of

N/a

**Unit Of Measure:** 

Demilitarization:

No

Fiig:

T139-a
