Cross Sectional Shape:

Plain round

Wall Thickness:

0.035 inches

First End Style:

Spigot

Diameter:

1.000 inches

End Application:

Model f106a aircraft

Second End Relationship With First End:

Identical

Construction:

Seamless

Maximum Operating Pressure:

60.0 pounds per square inch

Special Features:

Three ended tube

Material:

Aluminum alloy

Material Specification:

Ww-t-700/4, type 1 federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A004a0
