Cross Sectional Shape:

Plain round

Wall Thickness:

0.035 inches

First End Style:

Outside beaded

First End Outside Diameter:

1.500 inches

First End Bead Outside Diameter:

1.644 inches

First End Length From Bead Center To End:

Between 0.219 inches and 0.281 inches

Diameter:

1.500 inches

Second End Relationship With First End:

Identical

Construction:

Seamless

Maximum Operating Pressure:

250.0 pounds per square inch

Material:

Aluminum alloy

Material Specification:

Ww-t-700/4, 0, type 1 federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A004a0
