Cross Sectional Shape:

Plain round

Wall Thickness:

0.065 inches

First End Style:

Outside beaded

First End Outside Diameter:

Between 2.490 inches and 2.506 inches

First End Bead Outside Diameter:

2.664 inches

First End Length From Bead Center To End:

Between 0.219 inches and 0.281 inches

Diameter:

2.500 inches

Second End Relationship With First End:

Identical

Construction:

Seamless

Material:

Aluminum alloy

Material Specification:

Ww-t-700/4 federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A004a0
