Cross Sectional Shape:

Plain round

Wall Thickness:

0.028 inches

First End Style:

Outside beaded

First End Outside Diameter:

1.500 inches

Diameter:

1.500 inches

Second End Relationship With First End:

Identical

Construction:

Seamless

Maximum Operating Pressure:

600.0 pounds per square inch

Measuring Method And Length:

13.610 inches laying

Material:

Aluminum alloy

Material Specification:

Ww-t-700/6 federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A004a0
