Cross Sectional Shape:

Plain round

Wall Thickness:

0.115 inches

First End Style:

Outside grooved

Diameter:

0.355 inches

Second End Relationship With First End:

Identical

Construction:

Seamless

Maximum Operating Pressure:

6000.0 pounds per square inch

Special Features:

Made from 1/2 in. Tube, ends have 2 grooves and tube body is .355 in. In dia.

Material:

Stainless steel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A004a0
