Cross Sectional Shape:

Round

Inside Diameter:

15.8 millimeters

Outside Diameter:

19.5 millimeters

Features Provided:

Rigid

Inside Surface Condition:

Smooth

Measuring Method And Length:

206.8 millimeters

Special Features:

2 projections 1.77 mm from outside surface at ctr and end; one end counterbored 16.6 mm id

Material:

Plastic polyhexamethylene sebacamide tube or plastic polyhexamethylene amide tube

Material Specification:

L-p-410 federal specification single material response tube

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A54200
