| Mating End Quantity:                                                       |
|----------------------------------------------------------------------------|
| 2 single end                                                               |
| Tubing Material:                                                           |
| Steel, corrosion resisting                                                 |
| Design Form:                                                               |
| Prebent                                                                    |
| Tube Outside Diameter:                                                     |
| 0.125 inches                                                               |
| Special Features:                                                          |
| Used on left side of hagglunds dennison rotary pumps, models p11p and p14p |
| Shelf Life:                                                                |
| N/a                                                                        |
| Unit Of Measure:                                                           |
|                                                                            |
| Demilitarization:                                                          |
| No                                                                         |
| Fiig:                                                                      |
| T383-d                                                                     |
|                                                                            |
