Cross Sectional Shape:

Plain round

Wall Thickness:

0.049 inches

First End Style:

Outside beaded

First End Outside Diameter:

1.500 inches

First End Bead Outside Diameter:

1.644 inches

First End Length From Bead Center To End:

Between 0.219 inches and 0.281 inches

Diameter:

1.500 inches

Second End Relationship With First End:

Identical

Construction:

Seamless

Material:

Aluminum alloy 3003 or aluminum alloy or aluminum alloy 5052

Material Specification:

Ww-t-700/1 federal specification single material response or qq-a-225/7, alloy 5052 federal specification single material response

Specification Data:

19207-12358681 government specification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A004a0
