Cross Sectional Shape:

Plain round

Wall Thickness:

0.049 inches

First End Style:

Beveled

Diameter:

0.750 inches

End Application:

C130j hercules

Second End Relationship With First End:

Identical

Construction:

Seamless

Special Features:

Two holes 0.193/0.199 in. Diameter in line 0.750 in. Center to center both ends

Material:

Aluminum alloy

Material Specification:

Ww-t-700/3, type 1 federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A004a0
