End Application:

Hpms high pressure monitoring system

Design Form:

Straight

Working Surface Length:

483.0 millimeters

Branch Quantity:

1

Main Body Tube Wall Thickness:

0.084 inches

Special Features:

Assembly shall withstand 24000 psi and remain leak free

Material:

Stainless steel

Specification Data:

Asme y14.M-1994 professional/industrial association specification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A511a0
