Cross Sectional Shape:

Plain round

Wall Thickness:

0.5 millimeters

First End Style:

Plain

Welding Method:

Furnace butt

Diameter:

10.0 millimeters

Maximum Operating Temp:

600.0 degrees fahrenheit

End Application:

NSN2-42-001-5602

Second End Relationship With First End:

Identical

Construction:

Straight seamed

Maximum Operating Pressure:

1800.0 pounds per square inch

Measuring Method And Length:

1000.0 millimeters standard

Material:

Stainless steel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A004a0
