Wall Thickness:

0.020 inches

End Application:

F-16

Tubing Material:

Steel, corrosion resisting

End Connection Style:

Unthreaded external all ends

Design Form:

Prebent

Tube Outside Diameter:

0.500 inches

End Connection Specification/std:

Sae-as4330 for both ends a and b

Product Name:

Tube, lubrication-cooling, access, grbx

Special Features:

Export controlled item; 1st bend is 90.9, 2nd bend is 84.5 and 3rd bend is 50.0 degrees; next higher assembly is 16p1531; a and b end both flared; direction of flow toward b end; 600 psi proof pressure; 17.190 inches prebent length

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T383-d
