Cross Sectional Shape:

Round

Inside Diameter:

0.250 inches

Outside Diameter:

0.750 inches

Burst Test Pressure:

1000.0 pounds per square inch single response

Layer Composition And Location:

Outer layer molded rubber, synthetic err-100

Hydrostatic Test Pressure:

500.0 pounds per square inch single response

Inside Surface Condition:

Smooth

Measuring Method And Length:

6.000 inches

Material:

Rubber synthetic tube

Media For Which Designed:

Air single response and fuel/oil, hydrocarbon single response and water single response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A541z0
