Cross Sectional Shape:

Round

Inside Diameter:

0.625 inches

Outside Diameter:

0.797 inches

Layer Composition And Location:

Outer layer braided corrosion resistant steel wire

Outer Covering Environmental Protection:

Corrosion resistant

Inside Surface Condition:

Smooth

Measuring Method And Length:

29.800 inches working

Media For Which Designed:

Hydraulic fluid single response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A542a0
