Cross Sectional Shape:

Round

Inside Diameter:

0.625 inches

Outside Diameter:

1.000 inches

Layer Composition And Location:

Outer layer molded rubber, synthetic err-100

Hydrostatic Test Pressure:

250.0 pounds per square inch single response

Outer Covering Environmental Protection:

Oil resistant and ozone resistant

Inside Surface Condition:

Smooth

Measuring Method And Length:

10.500 inches

Material:

Rubber synthetic tube

Media For Which Designed:

Air single response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A541z0
