Cross Sectional Shape:

Round

Wall Thickness:

0.030 inches

Inside Diameter:

6.000 inches first end

Connection Type:

Plain both ends

Features Provided:

Ozone resistant

Maximum Operating Pressure:

15.0 pounds per square inch

Measuring Method And Length:

36.000 inches

Material:

Plastic polyamide 3rd ply and rubber silicone class q 3rd ply

Style Designator:

Sleeve section

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A229a0
