Cross Sectional Shape:

Round

Wall Thickness:

Between 0.030 inches and 0.060 inches

Inside Diameter:

1.250 inches first end

Connection Type:

Plain both ends

Features Provided:

Ozone resistant

Maximum Operating Pressure:

15.0 pounds per square inch

Measuring Method And Length:

120.000 inches

Material:

Plastic polyamide 3rd ply and rubber silicone class q 3rd ply

Style Designator:

Sleeve section

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A229a0
