Cross Sectional Shape:

Round

Inside Diameter:

1.500 inches

Outside Diameter:

1.750 inches

Inner Conveying Tube Style:

Overlapped square locked unpacked

Outer Covering Environmental Protection:

Corrosion resistant and waterproof and vibration resistant

Measuring Method And Length:

20.000 inches

Special Features:

Layer composition and location: spiral overlapped square locked brass, last layer

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A541z0
