Cross Sectional Shape:

Round

Temperature Rating:

-22.0 degrees fahrenheit single response and 160.0 degrees fahrenheit single response

Minimum Inside Bending Radius:

2.000 inches

Burst Test Pressure:

7000.0 pounds per square inch

Layer Composition And Location:

Outer layer braided steel wire

Maximum Operating Pressure:

1500.0 pounds per square inch

Outer Covering Environmental Protection:

Heat resistant

Vacuum In Torr:

50.8

Measuring Method And Length:

7.300 inches working

Media For Which Designed:

Fuel/oil, hydrocarbon single response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A542a0
