Cross Sectional Shape:

Round

Wall Thickness:

0.090 inches

Inside Diameter:

1.500 inches first end

Connection Type:

Plain both ends

Features Provided:

Ozone resistant

Maximum Operating Pressure:

100.0 pounds per square inch

Measuring Method And Length:

3.500 inches

Material:

Fiberglass single ply and rubber silicone class q single ply

Style Designator:

Sleeve section

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A229a0
