Cross Sectional Shape:

Round

Inside Diameter:

0.500 inches first end

Connection Type:

Plain both ends

Features Provided:

Ozone resistant

Maximum Operating Pressure:

20.0 pounds per square inch

Measuring Method And Length:

4.000 inches

Style Designator:

Sleeve section

Test Data Document:

80205-nas521 standard (includes industry or association standards, individual manufactureer standards, etc.).

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A229a0
