Cross Sectional Shape:

Round

Inside Diameter:

0.500 inches

Outside Diameter:

0.671 inches

Inner Conveying Tube Style:

Interlocked packed

Layer Composition And Location:

Outer layer spiral interlocked steel

Hydrostatic Test Pressure:

750.0 pounds per square inch single response

Measuring Method And Length:

600.000 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A541z0
