Cross Sectional Shape:

Round

Exterior Color:

Natural

Angle Between Rigid Elbow Fittings In Deg:

90.0

Connection Type:

Threaded internal tube 1st end

Layer Composition And Location:

1st layer molded polytetrafluoroethylene and outer layer braided corrosion resistant steel wire

Inside Surface Condition:

Smooth

Measuring Method And Length:

16.620 inches working and 16.870 inches working

Media For Which Designed:

Fuel/oil, hydrocarbon single response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A542a0
