| Cross Sectional Shape:                  |
|-----------------------------------------|
| Round                                   |
| Inside Diameter:                        |
| 0.250 inches                            |
| Outside Diameter:                       |
| 0.500 inches                            |
| Min. Tensile Strength (psi):            |
| 1100 pounds per square inch             |
| Inside Surface Condition:               |
| Smooth                                  |
| Material:                               |
| Rubber synthetic tube                   |
| Media For Which Designed:               |
| Fuel/oil, hydrocarbon single response   |
| Specification Data:                     |
| 81348-zz-t-831 government specification |
| Specification Or Standard:              |
| 2 type and 2 class                      |
| Shelf Life:                             |
| N/a                                     |
| Unit Of Measure:                        |
|                                         |
| Demilitarization:                       |
| No                                      |
| Fiig:                                   |
| A54200                                  |
|                                         |
|                                         |
