Cross Sectional Shape:

Round

Wall Thickness:

Between 0.020 inches and 0.030 inches

Inside Diameter:

0.870 inches first end

Endlength:

0.750 inches both ends

Connection Style:

Round both ends

Connection Type:

Preformed both ends

End Inside Diameter:

0.875 inches both ends

Measuring Method And Length:

7.300 inches

Material:

Plastic single ply

Style Designator:

Fully convoluted

Specification Data:

81349-l-p-390 government specification

Specification Or Standard:

4 category and I class and 2 grade and i type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A229a0
