Cross Sectional Shape:

Round

Temperature Rating:

-40.0 degrees fahrenheit and 300.0 degrees fahrenheit single response

End Application:

2815-01-043-7092

Layer Composition And Location:

1st layer braided corrosion resistant steel wire, partial coverage and outer layer rubber impregnated fabric

Inside Surface Condition:

Smooth

Measuring Method And Length:

37.220 inches working

Media For Which Designed:

Fuel/oil, hydrocarbon single response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A542a0
