**Cross Sectional Shape:**

Round

**Wall Thickness:**

0.070 inches

**Inside Diameter:**

1.750 inches first end

**Connection Type:**

Plain both ends

**Features Provided:**

Ozone resistant

**Maximum Operating Pressure:**

15.0 pounds per square inch

**Measuring Method And Length:**

6.000 inches

**Material:**

Steel reinforcing wire and steel reinforcing wire

**Style Designator:**

Fully convoluted w/ wire rings between convolutions

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A229a0
