Cross Sectional Shape:

Round

Wall Thickness:

0.070 inches

Inside Diameter:

1.750 inches first end

Connection Type:

Plain both ends

Features Provided:

Ozone resistant

Maximum Operating Pressure:

15.0 pounds per square inch

Measuring Method And Length:

6.000 inches

Material:

Steel reinforcing wire and steel reinforcing wire

Style Designator:

Fully convoluted w/ wire rings between convolutions

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A229a0
