Cross Sectional Shape:

Round

Temperature Rating:

-40.0 degrees fahrenheit single response and 200.0 degrees fahrenheit single response

Minimum Inside Bending Radius:

3.050 inches

Connection Type:

Threaded internal tube 1st end

Layer Composition And Location:

Outer layer braided steel wire

Outer Covering Environmental Protection:

Corrosion resistant

Inside Surface Condition:

Smooth

Measuring Method And Length:

13.000 inches excluding end fittings

Special Features:

Fitting .50-in female jic swivel; material aisi 12114 or equivalent

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A542a0
