Cross Sectional Shape:

Round

Inside Diameter:

2.500 inches

Outside Diameter:

Between 2.500 inches and 3.420 inches

End Application:

Fire pump intake and exhaust, diesel driven

Burst Test Pressure:

1000.0 pounds per square inch

Maximum Operating Pressure:

250.0 pounds per square inch

Measuring Method And Length:

384.0 millimeters excluding end fittings and 621.0 millimeters

Special Features:

First end male union 2.5npt; second end 2.75 in. Welded nipple

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A542a0
