**Cross Sectional Shape:**

Round

**Inside Diameter:**

2.500 inches

**Outside Diameter:**

Between 2.500 inches and 3.420 inches

**End Application:**

Fire pump intake and exhaust, diesel driven

**Burst Test Pressure:**

1000.0 pounds per square inch

**Maximum Operating Pressure:**

250.0 pounds per square inch

**Measuring Method And Length:**

384.0 millimeters excluding end fittings and 621.0 millimeters

**Special Features:**

First end male union 2.5npt; second end 2.75 in. Welded nipple

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A542a0
