Cross Sectional Shape:

Round

Temperature Rating:

-65.0 degrees fahrenheit and 275.0 degrees fahrenheit single response

End Application:

Mcdonnell douglas c-17a aircraft

Layer Composition And Location:

1st layer braided polyamide cord and 2nd layer braided polyamide cord and outer layer braided textile yarn

Measuring Method And Length:

22.500 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A542a0
