**Cross Sectional Shape:**

Round

**Temperature Rating:**

-65.0 degrees fahrenheit single response and 250.0 degrees fahrenheit single response

**Minimum Inside Bending Radius:**

5.500 inches

**End Connection Design:**

Elbow 2nd end

**Maximum Operating Pressure:**

100.0 pounds per square inch

**Hydrostatic Test Pressure:**

300.0 pounds per square inch

**Flow Angle:**

71.0 degrees 2nd end

**Outer Covering Environmental Protection:**

Corrosion resistant

**Inside Surface Condition:**

Smooth

**Measuring Method And Length:**

13.502 inches

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A542a0
