Cross Sectional Shape:

Round

Temperature Rating:

-65.0 degrees fahrenheit single response and 250.0 degrees fahrenheit single response

Minimum Inside Bending Radius:

5.500 inches

End Connection Design:

Elbow 2nd end

Maximum Operating Pressure:

100.0 pounds per square inch

Hydrostatic Test Pressure:

300.0 pounds per square inch

Flow Angle:

71.0 degrees 2nd end

Outer Covering Environmental Protection:

Corrosion resistant

Inside Surface Condition:

Smooth

Measuring Method And Length:

13.502 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A542a0
