Cross Sectional Shape:

Round

Minimum Inside Bending Radius:

7.500 inches

End Application:

Special aircraft equipment - firefighting truck

Maximum Operating Pressure:

250.000 pounds per square inch

Measuring Method And Length:

100.000 inches excluding end fittings

Special Features:

12.00 in. Of reinforced rubber at ends

Media For Which Designed:

Water, salt single response

Supplementary Features:

1end1 1/2"-11.5npsh female, other end male1 1/2"11.5npsh

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A542a0
