Cross Sectional Shape:

Round

Temperature Rating:

-65.0 degrees fahrenheit single response and 250.0 degrees fahrenheit single response

End Application:

Usn's stalwart class tagos

Burst Test Pressure:

26000.0 pounds per square inch

Maximum Operating Pressure:

6500.0 pounds per square inch

Measuring Method And Length:

48.000 inches

Special Features:

Od hose 5mm; outer shell polyimide; stainless steel fittings, thread series 1215

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A542a0
