Cross Sectional Shape:

Round

Temperature Rating:

-40.0 degrees fahrenheit single response and 250.0 degrees fahrenheit single response

End Application:

Aircraft freedom fighter f-5

Burst Test Pressure:

16000.0 pounds per square inch

Maximum Operating Pressure:

4000.0 pounds per square inch

Measuring Method And Length:

60.000 inches

Special Features:

4 spiral wire reinforced; fittings p/n 33704-16-16s

Media For Which Designed:

Fuel/oil, hydrocarbon single response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A542a0
