**Cross Sectional Shape:**

Round

**Temperature Rating:**

-40.0 degrees fahrenheit single response and 250.0 degrees fahrenheit single response

**End Application:**

Aircraft freedom fighter f-5

**Burst Test Pressure:**

16000.0 pounds per square inch

**Maximum Operating Pressure:**

4000.0 pounds per square inch

**Measuring Method And Length:**

60.000 inches

**Special Features:**

4 spiral wire reinforced; fittings p/n 33704-16-16s

**Media For Which Designed:**

Fuel/oil, hydrocarbon single response

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A542a0
