Cross Sectional Shape:

Round

Inside Diameter:

12.7 millimeters

Tempurature Rating:

125.0 degrees celsius single response

Outside Diameter:

19.05 millimeters

End Application:

NSN2-32-001-4476

Layer Composition And Location:

1st layer rubber composition err-100

Inside Surface Condition:

Smooth

Measuring Method And Length:

19.500 inches excluding end fittings and 20.500 inches excluding end fittings

Material:

Rubber tube

Media For Which Designed:

Ethylene glycol single response and water single response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A541z0
