Cross Sectional Shape:

Round

Inside Diameter:

0.4375 inches

Outside Diameter:

0.500 inches

End Application:

1440-01-364-3292, launcher-transporter, guided missile, p/n 13235388, 18876

Maximum Operating Pressure:

3000.0 pounds per square inch

Measuring Method And Length:

256.000 inches

Product Name:

Hose assembly, tetrafluoroethylene, hydraulic and pneumatic, (3000 psi), straight to elbow 90 degree flareless

Media For Which Designed:

Hydraulic fluid single response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A542a0
