Cross Sectional Shape:

Round

Inside Diameter:

0.795 inches

Outside Diameter:

0.675 inches

Inside Surface Condition:

Smooth

Measuring Method And Length:

5.000 inches

Product Name:

Coupling, hose

Special Features:

Synthetic rubber material must be resistant to synthetic turbine oil, fuels, and saltwater (i.E. Nitrile as found in pn 951212-2)

Material:

Rubber synthetic tube

Media For Which Designed:

Water, salt single response and fuel/oil, hydrocarbon single response

Specification Data:

81349-mil-r-6855 government specification and 63631-drawing 405668 manufacturers source control

Specification Or Standard:

1 class and 60 grade and 6.75 size

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A541z0
