Cross Sectional Shape:

Round

Temperature Rating:

-54.0 degrees celsius single response and 135.0 degrees celsius single response

Minimum Inside Bending Radius:

2.880 inches

End Application:

Tornado aircraft

Maximum Operating Pressure:

1000.0 pounds per square inch

Measuring Method And Length:

8.430 inches excluding end fittings

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A542a0
