Cross Sectional Shape:

Round

Inside Diameter:

0.166 inches

Outside Diameter:

0.196 inches

End Application:

Ship, I17 air lubricator

Inside Surface Condition:

Smooth

Measuring Method And Length:

7.375 inches

Product Name:

Siphon tube

Special Features:

Nylon tube, semi clear; lubricates compressed air up to 250 psi, from 0 degree to 175 degrees f

Material:

Plastic polyamide tube

Media For Which Designed:

Fuel/oil, hydrocarbon single response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A54200
