**Cross Sectional Shape:**

Round

**Temperature Rating:**

-54.0 degrees celsius single response and 135.0 degrees celsius single response

**Burst Test Pressure:**

6500.0 pounds per square inch

**Maximum Operating Pressure:**

250.0 pounds per square inch

**Measuring Method And Length:**

18.890 inches excluding end fittings

**Special Features:**

First end - coupling assembly; second end - nipple subassembly; material cres except sleeve of aluminum; surface treatment - on the cres, passivated per ams-qq-p-35 and on aluminum, anodized per mil-a-8625; application - for phosphate ester base fluids

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A542a0
