Cross Sectional Shape:

Round

Temperature Rating:

-54.0 degrees celsius single response and 135.0 degrees celsius single response

Burst Test Pressure:

6500.0 pounds per square inch

Maximum Operating Pressure:

250.0 pounds per square inch

Measuring Method And Length:

18.890 inches excluding end fittings

Special Features:

First end - coupling assembly; second end - nipple subassembly; material cres except sleeve of aluminum; surface treatment - on the cres, passivated per ams-qq-p-35 and on aluminum, anodized per mil-a-8625; application - for phosphate ester base fluids

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A542a0
