Cross Sectional Shape:

Round

Temperature Rating:

-60.0 degrees fahrenheit single response and 160.0 degrees fahrenheit single response

End Application:

5420-00-889-2020

Measuring Method And Length:

33.000 inches

Product Name:

Hose assembly

Special Features:

First end is straight/2nd end is elbow with a 90 degree bend

Supplementary Features:

The assembly shall meet cleanliness requirements per mil-std-1246, level 300. Packaging shall be sufficient to maintain level of specified cleanliness during shipping/fitting will be made of corrosion resistant steel, type 304

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A542a0
