Cross Sectional Shape:

Round

Inside Diameter:

0.188 inches

Outside Diameter:

0.312 inches

End Application:

Tva-1000 (0hts3) , toxic vapor analyzer

Inside Surface Condition:

Smooth

Product Name:

(inavy) tygon tubing

Special Features:

Good chemical resistance; non toxic; nearly colorless walls are very smooth therefore resisting abrasion and contamination; ideal for condensers, incubators, desiccators, gas lines and drain lines, for all types of chemicals and gases and liquids

Material:

Plastic tube

Supplementary Features:

Tubing material is clear, resilient, comparable to rubber in toughness, flexibility and dielectric strength; wall thickness is 0.062 inches; this model is 50 feet in length (600 inches)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A54200
